Open to remote or on-site — willing to relocate.

SUMMARY

Full-stack engineer who rebuilt a retail business's entire digital stack solo: e-commerce platform, marketplace integrations, a POS database migration, and PCI-compliant payment automation. All with measurable revenue impact. Ships features end to end in TypeScript, React, and Node, and builds integrations and automations against third-party APIs.

SKILLS

Languages: TypeScript, JavaScript, Python, SQL, PHP

Frontend: React, Next.js, HTML, CSS

Backend & Data: Node.js, REST API design & third-party integration, SQL databases, authentication (NextAuth)

Tools: Git, PM2, VS Code

EXPERIENCE

The Starving Musician — Software Engineer

2025 – Present

Santa Cruz, CA (with the company since 2022; moved into a full-time engineering role in 2025)

- Consolidated two legacy websites into a single full-stack e-commerce platform on a modern React/Next.js stack, nearly doubling online sales.
- Built and automated the company's Reverb marketplace operation, integrating against the Reverb API to sync inventory and listings, growing Reverb revenue from roughly \$10–20K to \$120K+ per year and reaching Reverb's top-300 sellers.
- Migrated the point-of-sale system to a modern SQL-backed version and built integrations and automations for inventory and sales that removed 10–20 hours of manual data entry per week.
- Designed and built an automated recurring-payment system for long-term instrument rentals, replacing manual card entry and bringing the business into PCI compliance by ending paper storage of card data.
- Identified and fixed 7 security vulnerabilities in the checkout/payment integration, then re-tested and deployed the hardened flow.

Holonis — Software Engineer Intern

05/2020 – 10/2020

San Diego, CA

- Built front-end features in React for the platform's internal admin interface, working with a small engineering team on an Agile cycle and documenting features for maintainability.

PROJECTS

Rental Autopay System — Automated recurring billing for instrument rentals; PCI-conscious card handling.

Portfolio Site — Full-stack Next.js application with CRUD functionality showcasing personal projects.

EDUCATION

University of California, Santa Cruz — B.S. in Computer Science, 2025
